DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 23, 2003 has been entered.

Election/Restrictions

2. Claims 126-145 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Claims 124 and 125 have been searched and examined only to the extent that they read on the elected invention, 7-carbon diols. *No claims can pass to issue until all non-elected subject matter is deleted from the claims.*

Double Patenting

3. Claims 124 and 125 remain rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2 and 11, at

least, of US patents 6,369,025 B1 and 6,323,172 B1 for the reasons of record in the previous office action.

Claim Rejections - 35 USC § 103

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 124 and 125 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Katznellenbogen et al., Martin et al., Eliel et al., and Green et al. for the reasons of record in the previous office action.

Response to Arguments

6. Applicant's arguments filed June 23, 2003 have been fully considered but they are not persuasive. Applicant argues that, while the examiner believes that the presently claimed 7-carbon diols are simple structural isomers of those disclosed in the prior art, the prior art does not motivate the preparation of the presently claimed diols. This is not persuasive because the criterion for obviousness is not whether the references motivate the preparation of these diols; it is whether the person of ordinary skill would believe that the presently claimed diols have the same or similar properties as those of the prior art. The examiner maintains that this is the case. Such may be rebutted by applicant by preparing and comparing the diols of the prior art with those presently claimed.
7. As a courtesy to applicant, this action is NOT FINAL.
